

- NOTES**
1. All capacitor values greater than 1 are in MMF unless otherwise noted. All capacitor values less than 1 are in MFD unless otherwise noted.
  2. All resistors are 1/2 watt, 10%, carbon unless otherwise noted.
  3. Voltages are dc from point shown to chassis. Voltages are read using a VTVM. Voltages were taken with no signal. The receiver was adjusted for a good quality picture, i.e., normal contrast, brightness, width, height, vertical lin. and sound, picture in sync, then signal is removed.
  4. ● Indicates a coil resistance of less than .5 ohms. Resistance measured with coil in circuit.
